**If you wish to spend a little less**

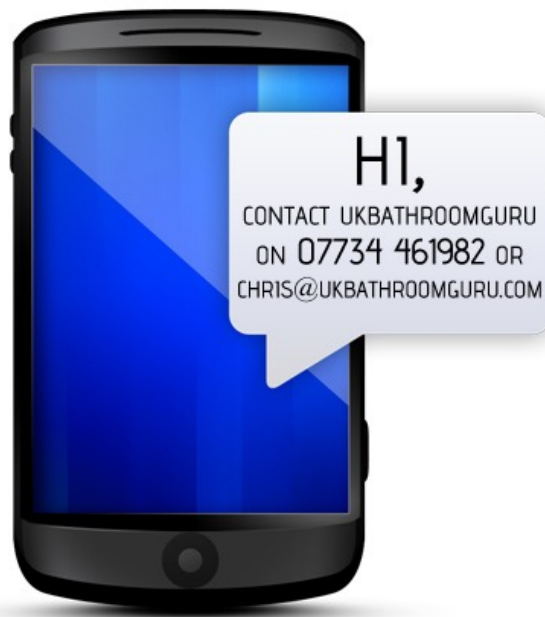

- Swop a tiled floor for a vinyl floor as above – there are many nice designs available and vinyl has many benefits – see [here](#) for more information.
- Consider **half tiling** a room rather than fully tiling it wall to ceiling
- Consider plain ceramic wall tiles without a border tile rather than large format or porcelain tiles to save on tiling materials & labour.
- Have a **central ceiling light** rather than several spot lights.
- Do a bit of DIY – If the room is being plastered, maybe you could paint it to save costs?
- Swop wall hung vanity units & toilets for more affordable close coupled toilets and basins / pedestals, which can still look fantastic.

---

# Step 6 – Working Out The Details

Between now and the start date, we will be speaking to each other a fair bit!

Normally, this is to work out things such as:

- Tile choice (I normally can get a sample for you if you have something specific in mind or I can recommend a few local retailers that I believe will have what you are after.)
- Suite items e.g. showers, baths, taps etc – many of these can be seen at my suppliers local showroom.
- A start date and a rough schedule of work will be confirmed.
- A payment schedule will be agreed – this will not involve any money ‘up front’ though may include a stage payment depending on the size of the job. The balance payment will be due by bank transfer upon completion of the job.

---

# Next Step

Give me a call on 07734 461982 to move a step closer to a new bathroom.

Many thanks

Chris

# Bathroom Installation Frequently Asked Questions (FAQ's)

## GENERAL

### What do you do?

I carry out project managed bathroom installations in Leeds from initial consultation & design through to completion, with my team of quality local tradesmen.

Please see [here](#) for more information on working with me.

### What areas do you cover?

I live near Kirkstall Abbey and serve North Leeds out as far as Harrogate. I also work out towards Ilkley and over towards Crossgates. If you're in doubt, then give me a call and I can advise you.

---

## Can you assist me? I don't have a clue where to start!

Of course! Everyone starts in your position.

[Get in touch](#) to arrange a free site survey and I can discuss your requirements.

I am happy to give advice as to what will fit, what is possible and how much things generally cost.

## **PAYMENT / COSTS**

### How much do your bathrooms cost?

Bathrooms start at [5K](#).

En suites generally start at [£4K](#).

Knocking through a WC & bathroom costs from [£7K](#).

Installing a downstairs loo costs from [£3K](#).

Replacing a bath with a shower generally costs from 2.5K.

This will include a site survey & bathroom plan prior to installation as well as...

- Waste disposal costs
- Stripping the old bathroom
- Reboarding the walls prior to tiling / plastering
- Plastering
- Painting & decorating
- Wall tiling
- Floor preparation & tiling
- Supply & installation of the new bathroom suite
- Electrics e.g. adding ceiling spotlights, extractor fans to [deal with humidity](#) & shaver points
- Underfloor heating on some installations

My focus is on quality and longevity of installation and providing genuine value, not being the cheapest around.

Please see [here](#) for more information.
